

10 คำถามสัมภาษณ์ UX/UI Design

1. Could you tell me a little bit about yourself?

คุณช่วยเล่าเกี่ยวกับตัวคุณเองให้ฟังสักเล็กน้อยได้ไหม?

Nice to meet you. My name is Chanchanok, but you can call me Kaem. I'm a fourth-year student studying ICT at Prince of Songkla University.

I'm interested in design, especially designing websites and applications based on users' needs and clients' requirements. I'm also ready to learn new things and gain real work experience from this internship.

2. Why are you interested in UX/UI design?

ทำไมคุณถึงสนใจงานด้าน UX/UI Design?

I'm interested in UX/UI because I really enjoy design.

I like thinking about how to improve a website or application for users. I enjoy thinking about whether it meets their needs and whether it is easy to use.

That's why I feel that UX/UI is interesting and suitable for me.

3. Why did you apply for this UX/UI Designer position?

ทำไมคุณถึงสมัครตำแหน่ง UX/UI Designer นี้?

I became interested in this position because of my final project.

In this project, I had a chance to collect requirements from the client, understand their needs, design the website, and show the design to them.

The client gave us feedback, and we improved our work based on their feedback.

I really enjoyed this process because I could experience how real projects work.

4. Could you walk me through one of your projects in your portfolio?

ช่วยเล่าและอธิบายขั้นตอนการทำโปรเจกต์หนึ่งใน Portfolio ของคุณให้ฟังได้ไหม?

My final project is a website for recording nursing professional license exam results.

We worked with the Faculty of Nursing, and our clients were the staff from the faculty.

Currently, there is no website that allows students to submit their exam results by themselves. The staff have to check and collect the information manually.

So, we developed this system to make the process easier for them.

The website is almost finished. We also got more feedback from the Faculty of Nursing, and we are currently improving the system.

This time, we also talked with their IT team. I think there is a good chance that this website will actually be used in the future.

5. What was your role in that project?

คุณมีหน้าที่หรือรับผิดชอบอะไรในโปรเจกต์นั้น?

My main responsibility was UX/UI design.

My project partner and I worked together on the other parts of the project.

I focused on the website's design, layout, and user experience.

My partner mainly worked on the server and backend.

So, I was mainly responsible for the frontend design and UX/UI, while my partner focused on the backend.

6. How do you usually start a new UX/UI design project?

โดยปกติคุณเริ่มต้นโปรเจกต์ UX/UI ใหม่อย่างไร?

First, I try to understand what the users and clients need.

For this project, I studied the nursing professional license exam in detail. Then, I decided what information and features the website should have.

After that, I created a wireframe and designed it using Figma.

7. How do you make sure that your design meets users' needs?

คุณมั่นใจได้อย่างไรว่าดีไซน์ของคุณตอบโจทย์ความต้องการของผู้ใช้?

I get confidence from my team members.

After I finish the design, I ask my team members for feedback. If they find any problems, we discuss them together.

Even if I feel confident about the UI design, I'm always open to feedback. If there is something that needs to be improved, I will fix it so we can make the best result.

8. What design tools are you familiar with?

คุณคุ้นเคยหรือสามารถใช้เครื่องมือด้านการออกแบบอะไรได้บ้าง?

My main skills are Figma and Canva.

I can use Figma to create prototypes and design UI.

I also use Canva for editing and creating visual content.

9. How do you handle feedback or criticism about your design?

คุณรับมือกับ Feedback หรือคำวิจารณ์เกี่ยวกับงานออกแบบของคุณอย่างไร?

I'm always open to feedback and willing to make changes.

I believe that sometimes we cannot see our own mistakes or things that are missing, but other people can see them.

So, I'm always open to opinions and feedback, and I'm willing to improve my work.

10. What are your strengths and weaknesses as a UX/UI designer?

จุดแข็งและจุดอ่อนของคุณในฐานะ UX/UI Designer คืออะไร?

My strength is that I'm open to feedback and I can make changes quickly. I don't leave problems unfinished.

My weakness is that I still need to improve my requirement-gathering skills. But I believe I can improve through real work experience.

If I get this internship, I will work hard, learn quickly, and improve myself. I'll make sure the company won't be disappointed.
